

# REWOSOFT® TE 19 L

## Product description

Di-(hard tallow fatty acid amidoethyl)-N-polyethoxy ammonium lactate.

## Physical properties

|    |                             |                   |
|----|-----------------------------|-------------------|
| 1. | Appearance (20 °C)          | yellow, solid     |
| 2. | pH value (5 % in IPA/water) | 4.5 – 6.5         |
| 3. | Active matter               | 0.90 – 1.05 meq/g |
| 4. | Colour (Gardner)            | <= 5              |

## Application

REWOSOFT® TE 19 L is used as softener, antistatic and levelling agent.

REWOSOFT® TE 19 L is useful in applications as:

- softener for cellulosic fibers
- softener and antistatic agent for synthetic fibers
- softener for preparation of acrylic flock (application in the dyeing bath)
- softener, antistatic and levelling agent for the one bath dyeing and finishing of acrylics (hanks)

## Properties / Benefits

REWOSOFT TE® 19 L is a highly concentrated pseudo-cationic softener. It has excellent softening, antistatic and non-yellowing performance, being suitable for the treatment of native and synthetic fibers, especially of cotton and acrylics.

Goods treated with REWOSOFT® TE 19 L show a soft and greasy hand.

REWOSOFT® TE 19 L is compatible with non-ionic, amphoteric and cationic substances and is not compatible with anionic substances and optical brighteners. It exhibits good stability to acids, electrolytes and water hardness.

It is dispersible in water.

## Dosage / Handling

For padding approx. 0.6 – 2.0 g/l REWOSOFT® TE 19 L is used for cellulosics and approx. 1.0 to 5.0 g/l REWOSOFT® TE 19 L is used for synthetics.

In the exhaust technique approx. 0.1 – 0.6 % REWOSOFT® TE 19 L (based on textile weight) is used (temperature about 35 – 50 °C, duration about 20 minutes).

Preparation of aqueous dispersions:

The REWOSOFT® TE 19 L melt (approx. 55 to 60 °C) is poured slowly under continuous stirring into warm water (approx. 35 – 45 °C). The pH-value of the dispersion is adjusted with lactic acid in the range 4.0 – 5.5. Finally, the dispersion is cooled slowly under stirring.

For the direct application it is recommended to use stock dispersions of approx. 10 % concentration.

## Registration status

REWOSOFT® TE 19 L is listed on the following chemical inventories:

EINECS.

### Storage stability

REWOSOFT® TE 19 L as delivered can be stored in closed steel drums for 6 months.

Prolonged storage at elevated temperatures (approx. 60 °C) will result in product discolouration.

### Packaging

180 kg net in open head steel drums 216 l

Packaging size: 4 x 180 kg = 720 kg

### Hazardous goods classification

Information concerning

- classification and labelling according to regulations for transport and for dangerous substances
- protective measures for storage and handling
- measures in case of accidents and fire
- toxicity and ecological effects

is given in our material safety data sheets.

12/2005

This information and all further technical advice is based on our present knowledge and experience. However, it implies no liability or other legal responsibility on our part, including with regard to existing third party intellectual property rights, especially patent rights. In particular, no warranty, whether express or implied, or guarantee of product properties in the legal sense is intended or implied. We reserve the right to make any changes according to technological progress or further developments. The customer is not released from the obligation to conduct careful inspection and testing of incoming goods. Performance of the product described herein should be verified by testing, which should be carried out only by qualified experts in the sole responsibility of a customer.
