

ABLUSOFT ACSK-P

ABLUSOFT ACSK-P combines the smooth hand, good draping qualities and rapid exhaust of cationic softeners with the very low-yellowing.

1. General Properties :

Nature	:	Aliphatic quaternary compound
Appearance	:	Light yellowish white pastille
Ionic	:	Cationic
pH (1%aq)	:	3 - 4
Solubility	:	Can disperse completely in 40 ~ 50°C water

2. Application :

Dissolving method :

ABLUSOFT ACSK-P	10 kg
warm water(40~50°C)	40 kg
cold water	50 kg
Total	100 kg

1. Add 10 kg **ABLUSOFT ACSK-P** and 40 kg warm water (40 ~ 50°C) into a tank and agitate for 20-30 minutes until completely dissolved.
2. Then add 50 kg cold water into the tank and agitate for 5-10 minutes.

ABLUSOFT ACSK-P can be applied to the textiles by dipping, exhausting and padding. A suitable treating temperature is about 50 °C. The treating concentration depends upon the kind of textiles and their uses. Ordinarily, **ABLUSOFT ACSK-P** is applied at 0.2 - 0.5 % o.w.f.

3. Packing : **ABLUSOFT ACSK-P** is supplied in 25 kg bag.
