

EL-80

(Leveling Agent for Cotton and Blends)

CHARACTERISTIC

1. EL-80 is an excellent leveling agent for cotton, rayon, and their blends dyed with reactive and directive dyestuffs.
2. EL-80 has good dispersing property, prevent agglomeration of dyestuffs in dyeing bath.
3. EL-80 has good buffer property, it can increase dissolubility and stability of dyestuffs within high concentration bath of sodium sulfate.
4. EL-80 is low foaming.

PROPERTIES

1. Appearance : Brown powder
2. Main component : Polymeric Surfactant
3. Ionic Character : Anionic
4. pH Value : 6.0 – 8.0 (1% sol.)
5. Solubility : miscible in cold water

DILUTION AND DOSAGE

The ratio of dilution is 25 parts of EL-80 powder to 75 parts of water

In general, 0.5 – 2g/l is recommended.

Cold water	Hot water (75C)
<ol style="list-style-type: none">1. Prepare desired amount of cold water and pour into tank2. Pour measured amount of EL-80 powder into the water3. Do not stir as it will affect solubility4. Leave the solution to sit overnight5. Stir till homogenous the next day, and it is ready to use	<ol style="list-style-type: none">1. Prepare desired amount of hot water and pour into tank2.
