

ABLUTEX NBF

(Fixing Agent for Acid Dyes)

ABLUTEX NBF is an excellent fixing agent for acid dyes which improves the wet fastness of dyeings with acid dyestuffs on polyamide fibers.

Characteristics :

Appearance	:	Light brown liquid
Ionic	:	Anionic
pH(1%)	:	3 – 4
Solubility	:	Soluble in water

Features :

1. **ABLUTEX NBF** has very good effectiveness.
2. Excellent stability in acid medium.
3. No influence on lightfastness.

Application :

The wet fastness properties of dyeings with acid dyestuffs on polyamide fibers can generally be improved by an after treatment with **ABLUTEX NBF**. In particular the fastness of dyeings to water, seawater, washing and perspiration is clearly improved.

The general dosage : 2 ~ 6% o.w.f.

Temp. : 80°C

pH : 4

Time : 20~30 mins

Packing : 120 kg / drum
