

## **RG-400** (Reduction Clearing Agent)

RG-400 is a liquid form reduction clearing agent. It can be added directly into dyeing machines without any requirement for preparation of stock solution.

RG-400 has excellent reduction and soaping capabilities. It can replace conventional reduction clearing agents including Sodium Hydrosulfite, Thiourea Dioxide, Rongalite, and etc. It is suitable for polyester substrates reduction clearing process. The treated textiles will yield excellent washing fastness.

RG-400 has extremely low odour. Residual odour will not be detected on the treated fabrics.

### **PROPERTIES**

Appearance	: Light yellow liquid
Composition	: Proprietary surfactant compound
Ionic Character	: Nonionic
pH Value	: 9.0 – 11.0
Solubility	: Easily soluble in cold water

### **APPLICATIONS**

#### 1. Reduction Clearing Process

<b>RG-400</b>	1-2g/l
NaOH (45%)	1g/l
	80-85°C x 20-30 minutes

#### 2. Cold water wash and neutralization

### **PACKING**

120KG PE DRUM
