

## LF-2100 (Light Fastness Improver)

### I. CHARACTERISTICS

1. LF-2100 can increase dyed textiles fastness to light. It is suitable for use with disperse, acid, direct, and reactive dyestuffs.
2. LF-2100 is suitable for use in both padding and exhaustion applications.
3. LF-2100 can be used with bleached textiles, however dosage should be controlled and tested in advance to prevent adverse effect to whiteness level.

### II. FEATURES

- Appearance : Milky white transparent liquid
- Composition : Special oil and surfactant mixture
- Ionic Character : Anionic
- pH Value : Neutral
- Solubility : Disperse in water

### III. RECOMMENDED APPLICATION AND DOSAGE

#### Application by Padding

Dyed Textile      **LF-2100**                      3-4% (O.W.F)

Bleached Textile **LF-2100**                      2-3% (O.W.F)

Pad    Cure    Dry

#### Application by Exhaustion

Dyed Textile      **LF-2100**                      3-4% (O.W.F)  
60°C x 30'

Bleached Textile **LF-2100**                      2-3% (O.W.F)  
60°C x 30'
